

SendSuite® Tracking Online saves time and money by doing parcel management more efficient.

SendSuite® Tracking Online is a cloud-based solution that simplifies registration, tracking and handling of incoming parcel and important mail. You get a better overview of what is sent within organisation and where it goes. SendSuite® Tracking Online has a high standard for precision and accuracy to help you to meet demands of your customers and users.

Get an overall picture of incoming parcels, including:

- What is received
- What time arrived
- The name of both sender and recipient
- Current status within the organization
- Exact delivery time to the recipient
- Proof Of Delivery
- Just scan the barcode on the package or letter.
- From the time it is received, all you need to know easily accessible. No particular training is required. Support is available via e-mail, chat and phone.

More efficient parcel management

Simplify the management of your incoming parcel
